Internal Active SCSI Single-end Terminator (HD68 F)

Highlights

- Active terminators include a voltage regulator circuit to compensate for fluctuations in the host adapter

Description

This Tripp Lite active internal SCSI III terminator provides the termination necessary at the end of a chain of U2W/U3W LVD SCSI drives. It is also capable of providing active negation termination to ultra-wide single-ended SCSI drive chains. This allows it to be used and re-used in any configuration. This single ended active terminator include a voltage regulator circuit to compensate for fluctuations in the host adapter. Has an HD68F connector. Tripp Lite warrants this product to be free from defects in materials and workmanship for life.

System Requirements

- Any internal SCSI ribbon cable where HD68 Male connectors are present

Package Includes

- Active Internal SCSI Terminator HD68F/ SE (Single-ended)

Features

- All Tripp Lite SCSI products, regardless of the SCSI generation, meet the latest specifications of ANSI
- Tripp Lite offers a complete line of internal and external solutions for SCSI/RAID and fibre channel ranging from the very latest Ultra 320 to legacy SCSI-1 and every combination in between
- Tripp Lite warrants this product to be free from defects in materials and workmanship for life
